A to Z

HYTROL

offers it all.

From its beginnings as a seed and feed handling conveyor company, Hytrol has grown into one of the largest conveyor manufacturers in the world. Hytrol has a complete line of conveyors and conveying equipment. The A-B-C list at right is only a small sampling of Hytrol's inventory. Tired of that unreliable, noisy, and outdated conveyor system? Your local Hytrol Distributor is there to help. If you have a special need or a product requiring sensitive handling, or you just want to save money by installing a modern sortation system, call the Hytrol distributor near you.

Zero-Pressure Accumulating Conveyors

Introducing Hytrol's PLEZD Heavy-Duty Plastic Belt Pallet Accumulator

Hytrol's model PLEZD is the most intelligent and efficient heavy duty, plastic belt accumulation conveyor in the industry. This pallet handling conveyor combines the intelligence of the patented EZLogic Accumulation System with the efficiency of the all new EZDrive System. The PLEZD utilizes the dependability of the plastic belt to convey loads considered non conveyable with conventional roll-to-roll conveyor such as flexi-

ble plastic pallets, footed pallets and unconventional wooden pallets. The many features and benefits that result from the combination of the patented EZLogic Accumulation System and the EZDrive System certainly places Hytrol's model PLEZD at the top of the list when it comes to a dependable, flexible and low maintenance solution for your pallet handling application.

The 26-CRPT Power Rotated Turntable

The 26-CRPT is used to rotate products up to 360 degrees. The turntable is powered by a shaft mounted gear motor complete with variable speed controller for soft start/stop and has proximity switches mounted on the base to sense position and control rotation of product. Turntable speed is 3 revolutions per minute with a 1 HP 460/3/60 gear motor. An 8-wire collector ring allows unlimited rotation of the turntable. Powered transition rollers, mounted on apron of the turntable deck, help move product onto and off the

turntable. The 26-CRR section has a Side Mounted Drive contained within the turning radius of the turntable. Standard speed is 30 FPM with 1/2 HP 460/3/60 gear motor. The tread rollers are 2-5/8 in. diameter with 7 gauge wall on 4 inch roller centers and have 2-5/8 in. dia. x .219 wall drive rollers with heavy duty bearings. Also available; gravity transition rollers and external transition roller sections (mounted to mating conveyors in the gap created by radius of turntable). Minimum Elevation - 16 inches.

Exploring hytrol.com

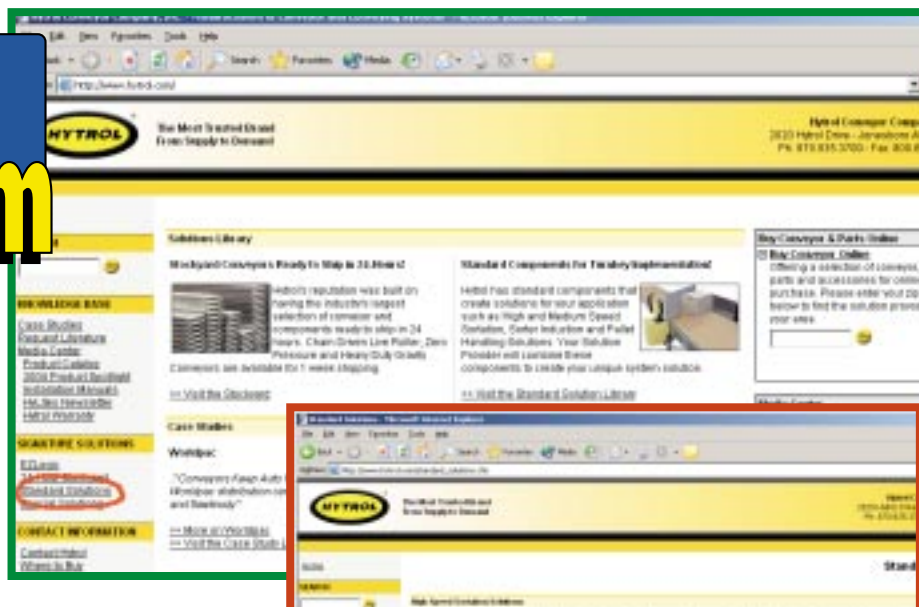

• Standard Solutions

Finding solutions to material handling issues is as easy as the click of your mouse! At www.hytrol.com, Hytrol's website (opening page), just scroll down to the SIGNATURE SOLUTIONS section and click on the "Standard Solutions" line. . .

You'll be taken to the STANDARD SOLUTIONS page. Here, the page is broken down into four sections; High Speed Sortation Solutions, Medium Speed Sortation Solutions, Induction Solutions, and Pallet Handling Solutions. If you see something that sparks your interest, you can choose either "Additional Info," or "View Video." The video is a new feature that was recently added.

If you choose to click on "Additional Info," a new page will open with more detailed information. And if you would like even more specification facts such as bed widths available, standard specs, optional equipment, etc., you can view Hytrol's catalog sheet by clicking on that line. You also have the option of downloading the catalog sheet. (Note: Not all the models featured are provided with catalog sheets.)

And, as always, if you have questions about any of Hytrol's conveyors or accessories, your local Hytrol distributor is just a phone call, fax, or e-mail away! They are there to help you. And Hytrol is here to help you find the solution to any material handling issue.
